

CSyLL
CYBER SECURITY LIVING LAB

THE HAGUE UNIVERSITY OF APPLIED SCIENCES · ZOETERMEER

Partnering with companies for cyber resilience

The Cyber Security Living Lab (CSyLL) is a hub where companies, researchers and students co-create practical cybersecurity solutions. We combine academic knowledge with hands-on innovation to help organizations strengthen their digital defenses.

What we offer your company

01 SOC & SIEM development
A SOC prototype with SIEM tooling and dashboards for real-time threat detection, before you invest at scale.

02 Penetration testing
An isolated lab for ethical hacking and vulnerability scanning: find weaknesses without risking production.

03 Threat intelligence
OSINT, dark web data and malware indicators turned into threat reports for your sector.

04 Use case design
Detection scenarios for insider threats and ransomware, built into your SIEM workflows.

05 UX testing & cognitive walkthroughs
Security measures people actually use, from MFA to secure login flows.

06 Focus groups & co-creation
Workshops with your team and our students on security awareness and policy.

07 Cyber war games & simulations
Test your incident response plan against a realistic ransomware or phishing attack.

08 Gamification & serious gaming
Interactive training that sticks, from phishing detection to password hygiene.

09 Validation & verification
Check your security controls against ISO 27001 and NIST before deployment.

10 Task analysis
Find the security-critical tasks and human-error points in your workflows.

Why collaborate with CSyLL?

Innovative solutions
Access to current research and practical prototypes.

Fresh talent
Motivated students who bring new perspectives.

Cost-effective
Test and validate strategies without major investments.

Knowledge sharing
Contribute to education, benefit from academic expertise.

Interested? Let's plan a conversation.
